Secured by Check Point

Good afternoon ACE,

Regarding the laboratory's reported issue for Case 51782/SDG GCPA2, please see the Region's input below and let me know if you have any questions.

LAB: "Lab has analyzed undiluted TVOA analysis for the samples GCPB0 & GCPB1 in a continuous analytical sequence. Both samples found positive with high concentration of target analytes detected and required dilution as well. Due to continuous analytical sequence, instrument blank was not analyzed in between the samples. In this case, lab will report undiluted TVOA analysis without instrument blank in between the samples and further dilution in final electronic deliverables.

Please see attached."

REGION: "The laboratory shall document the occurrence in the case narrative and continue with the analysis of the samples."

***** Please note that in order to waive/remove defects associated to this issue, please send a detailed waiver request to the appropriate ASB PM.

Thank you,

Hi Madison,

The laboratory shall document the occurrence in the case narrative and continue with the analysis of the samples.

Thanks,
Barry

Hi,

Lab is sending this email with regards to case 51782 and SDG GCPA2.

Lab has analyzed undiluted TVOA analysis for the samples GCPB0 & GCPB1 in a continuous analytical sequence. Both samples found positive with high concentration of target analytes detected and required dilution as well. Due to continuous analytical sequence, instrument blank was not analyzed in between the samples. In this case, lab will report undiluted TVOA analysis without instrument blank in between the samples and further dilution in final electronic deliverables.

Please see attached.
