Secured by Check Point

Good afternoon,

Please see the resolution below.

Issue: SDG H46R0 is open for water samples listed on the COC for TVOA Laboratory QC. However, a sample was not designated for Laboratory QC and the laboratory did not receive enough volume for Laboratory QC. Therefore, the laboratory would like to proceed without Laboratory QC. In addition, the laboratory would like confirm that any SEDD defect associated to Laboratory QC will be considered invalid.

Resolution: Per Region 8, proceeding without Laboratory QC is acceptable. The Region confirms that any SEDD defect associated with this issue will be considered invalid. The laboratory should note the issue in the SDG Narrative and proceed with the analysis of the samples.

Please note that the laboratory will have to contact the appropriate CLP COR should any defects need to be waived for this issue.

Hi Miles,

The laboratory may proceed without laboratory QC due to insufficient sample. Yes, I can confirm that any SEDD defect associated with this issue will be considered invalid.

Thanks,
Don

Good Afternoon,

I am assuming that the SDG the lab is referring to is for all of the samples on the provided COC (it is unclear, as one of the sample numbers has that SDG number). If that is the case, there was no project-specific lab QC requested and, therefore, from our perspective it is fine to proceed without project-specific QC. I don't know about the SEDD question.

Regards,
Tammi
