## CASE NARRATIVE

Aramark Uniforms Project Name: Monthly 2024 Project # N/A Chemtech Project # P5411 Test Name: TPH,BOD5,TSS

## A. Number of Samples and Date of Receipt:

2 Water samples were received on 12/31/2024.

#### **B.** Parameters:

According to the Chain of Custody document, the following analyses were requested: BOD5, Mercury, Metals Group1, Metals ICP-Group1, TPH and TSS. This data package contains results for TPH,BOD5,TSS.

#### **C. Analytical Techniques:**

The analysis of TPH was based on method 1664A, The analysis of TSS was based on method SM2540 D and The analysis of BOD5 was based on method SM5210 B.

#### **D. QA/ QC Samples:**

The Holding Times were met for all analysis. The Blank Spike met requirements for all samples. The Duplicate analysis met criteria for all samples. The Blank analysis did not indicate the presence of lab contamination. The Calibration met the requirements.

#### **E. Additional Comments:**

As per method 1664A, MS/MSD is required to be performed with the sample analysis. However, Lab did not receive sufficient volume to perform the MS/MSD therefore MS/MSD were not performed for this project.

I certify that the data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. The laboratory manager or his designee, as verified by the following signature has authorized release of the data contained in this hard copy data package.

## DATA REPORTING QUALIFIERS- INORGANIC

For reporting results, the following " Results Qualifiers" are used:

| J       | Indicates the reported value was obtained from a reading that was less<br>than the Contract Required Detection Limit (CRDL), but greater than or<br>equal to the Instrument Detection Limit (IDL).   |
|---------|--|
| U       | Indicates the analyte was analyzed for, but not detected.  |
| ND      | Indicates the analyte was analyzed for, but not detected   |
| Ε       | Indicates the reported value is estimated because of the presence of interference  |
| Μ       | Indicates Duplicate injection precision not met.   |
| Ν       | Indicates the spiked sample recovery is not within control limits.   |
| S       | Indicates the reported value was determined by the Method of Standard Addition (MSA).  |
| *       | Indicates that the duplicate analysis is not within control limits.  |
| +       | Indicates the correlation coefficient for the MSA is less than 0.995.  |
| D       | Indicates the reported value is from a secondary analysis with a dilution factor. The original analysis exceeded the calibration range.  |
| M<br>OR | <ul> <li>Method qualifiers</li> <li>"P" for ICP instrument</li> <li>"PM" for ICP when Microwave Digestion is used</li> <li>"CV" for Manual Cold Vapor AA</li> <li>"AV" for automated Cold Vapor AA</li> <li>"AV" for automated Cold Vapor AA</li> <li>"CA" for MIDI-Distillation Spectrophotometric</li> <li>"AS" for Semi – Automated Spectrophotometric</li> <li>"C" for Manual Spectrophotometric</li> <li>"T" for Titrimetric</li> <li>"NR" for analyte not required to be analyzed</li> <li>Indicates the analyte's concentration exceeds the calibrated range of the instrument for that specific analysis.</li> </ul> |
| Q       | Indicates the LCS did not meet the control limits requirements   |
| Н       | Sample Analysis Out Of Hold Time   |

#### APPENDIX A

#### **QA REVIEW GENERAL DOCUMENTATION**

Project #: P5411

Completed

| For thorough review, the report must have the following:   |          |
|--|----------|
| GENERAL:   |          |
| Are all original paperwork present (chain of custody, record of communication,airbill, sample<br>management lab chronicle, login page) | <u> </u> |
| Check chain-of-custody for proper relinquish/return of samples   |          |
| Is the chain of custody signed and complete  | <u> </u> |
| Check internal chain-of-custody for proper relinquish/return of samples /sample extracts   | <u> </u> |
| Collect information for each project id from server. Were all requirements followed  | <u> </u> |
| COVER PAGE:  |          |
| Do numbers of samples correspond to the number of samples in the Chain of Custody on login page  | <u> </u> |
| Do lab numbers and client Ids on cover page agree with the Chain of Custody  | <u> </u> |
| CHAIN OF CUSTODY:  |          |
| Do requested analyses on Chain of Custody agree with form I results  | <u> </u> |
| Do requested analyses on Chain of Custody agree with the log-in page   | <u> </u> |
| Were the correct method log-in for analysis according to the Analytical Request and Chain of Castody                                   | <u> </u> |
| Were the samples received within hold time   |          |
| Were any problems found with the samples at arrival recorded in the Sample Management Laboratory<br>Chronicle                          | <u> </u> |
| ANALYTICAL:  |          |
| Was method requirement followed?   | <u> </u> |
| Was client requirement followed?   | <u> </u> |
| Does the case narrative summarize all QC failure?  | <u> </u> |
| All runlogs and manual integration are reviewed for requirements   | <u> </u> |
| All manual calculations and /or hand notations verified  | <u> </u> |

QA Review Signature: <u>KETAN PATEL</u>

Comments:

- U = Not Detected
- LOQ = Limit of Quantitation
- MDL = Method Detection Limit
- LOD = Limit of Detection
- D = Dilution
- Q = indicates LCS control criteria did not meet requirements
- H = Sample Analysis Out Of Hold Time

- J = Estimated Value
- B = Analyte Found in Associated Method Blank
- \* = indicates the duplicate analysis is not within control limits.
- E = Indicates the reported value is estimated because of the presence of interference.
- OR = Over Range
- N =Spiked sample recovery not within control limits

|               |         | Bater value. | 5  |      | <br> | <br> | <br> |  |
| Concentration | β (CN⁻) | 1002         |    | mg/l |      |      |      |  |

Determination method: Argentometric titration.

The content of this solution was determined with silver nitrate standard solution (article number 1.09081) standardized against volumetric standard sodium chloride (article number 1.02406). The expanded measurement uncertainty is ± 0.7 % (k=2 coverage factor for 95% coverage probability). The certified value is traceable to primary standard NIST SRM 999c (NIST: National Institute of Standards and Technology, USA) by means of volumetric standard sodium chloride, measured in the accredited calibration laboratory of Merck KGaA, Darmstadt, Germany in accordance to DIN EN ISO/IEC 17025.

# Certificate of Analysis

This is to certify that units of the lot number below were tested and found to comply with the specifications of the grade listed. Certain data have been supplied by third parties. Acros Organics expressly disclaims all warranties, expressed or implied, including the implied warranties of merchantability and fitness for a particular purpose. Products are for research use or further manufacturing. Not for direct administration to human or animals. It is the responsibility of the purchaser, formulator or those performing further manufacturing to determine suitability based upon the intended use of the end product. Products are tested to meet the analytical requirements of the noted grade. The following information is the actual analytical results obtained.

| Catalog Number        | 15621 Quality Test / Release Date |  | 13 March 2019 |  |  |

#### FINISHED PRODUCT, LOT NUMBER, MFG. /EXP DATE: PolySeed® • Part No. P-110 • Lot 152305 • Mfg. Date: 05/2023 • Exp. Date: 05/2025

#### FORMULATION:

The formulation for this product contains a range of naturally occurring microorganisms, which are known to be non-pathogenic to man or animals.

#### VIABLE COUNT, FINAL TEST RESULT:

The product has been fully tested in accordance with Finished Product Specifications and contains a minimum viable count of  $4.00 \times 10^9$  cfu/g.

#### **GLUCOSE/GLUTAMIC-ACID RESULTS:**

Tested results within acceptable range 198 +/- 30.5 mg/L (167.5 - 228.5 mg/L). GGA Lot# L257-09 – Average Test Result: 203.4

See www.polyseed.com for details.

#### SEED CONTROL FACTOR:

Tested results within acceptable range 0.6 - 1.0 see www.polyseed.com for details

#### SALMONELLA TEST RESULT:

The product has been shown to be Salmonella negative using procedures recommended in the Microbiology Laboratory Guidebook, published by the USDA Food Safety and Inspection Service.

The purpose of this document is to assure that the Finished Product conforms to the above specification.

### Expiry

This product has no stated expiration date or shelf life.

We recommend to use the product within a time period of 5 years after date of QC release. This time period is valid only if the product is stored under dry and frost-free conditions. After 5 years we recommend retesting the adsorbent to make sure that the expected performance is still given.

### Confirmation

Hereby we confirm, that the above mentioned product has successfully passed our quality control system in accordance with ISO 9801 and meets the specific quality criteria.

This document has been produced electronically and is valid without a signature.

Volumetric glassware complies with Class A tolerance requirements of ASTM E 288 and NIST Circular 434; it is calibrated before first use and recalibrated regularly in accordance with ASTM E 542 and NIST Procedure NBSIR 74-461. Balances are calibrated regularly with weights certified traceable to the NIST national mass standard. Thermometers and temperature probes are calibrated before first use and recalibrated regularly with a thermometer traceable to NIST standards. All products are prepared according to master documents that assure manufacture according to validated methods. Batch records document raw material traceability and production and testing history for each lot manufactured.

# **Certificate of Analysis**

#### Sodium Thiosulfate, 0.0250 Normal (N/40)

#### Lot Number: 4403S13

Product Number: 7900

#### Manufacture Date: MAR 29, 2024 Expiration Date: SEP 2025

This product is specially formulated to increase its stability. A preservative is added to prevent bacterial contamination. However, all Sodium Thiosulfate solutions are subject to slow chemical deterioration and should be restandardized periodically.

Volumetric glassware complies with Class A tolerance requirements of ASTM E 288 and NIST Circular 434; it is calibrated before first use and recalibrated regularly in accordance with ASTM E 542 and NIST Procedure NBSIR 74-461. Balances are calibrated regularly with weights certified traceable to the NIST national mass standard. Thermometers and temperature probes are calibrated before first use and recalibrated regularly with a thermometer traceable to NIST standards. All products are prepared according to master documents that assure manufacture according to validated methods. Batch records document raw material traceability and production and testing history for each lot manufactured.

#### Alkaline-Iodide-Azide, Pomeroy Formulation for Dissolved Oxygen (DO) Analysis

Manufacture Date: APR 05, 2024 Expiration Date: APR 2026

Passed

Lot Number: 1405D67

Free Iodine

Product Number: 535

This solution is intended for use with samples with high Dissolved Oxygen content (above 15 mg/L) and for samples with high concentrations of organic material.

Thermo Fisher Scientific's Quality System has been found to conform to Quality Management System Standard ISO9001:2015 by SAI Global Certificate Number CERT - 0120633

This is to certify that units of the lot number below were tested and found to comply with the specifications of the grade listed. Certain data have been supplied by third parties. Thermo Fisher Scientific expressly disclaims all warranties, expressed or implied, including the implied warranties of merchantability and fitness for a particular purpose. Products are for research use or further manufacturing. Not for direct administration to humans or animals. It is the responsibility of the final formulator and end user to determine suitability based upon the intended use of the end product. Products are tested to meet the analytical requirements of the noted grade. The following Information is the actual analytical results obtained.

| Catalog Number    | H303  | Quality Test / Release Date   | 02/23/2024                                  |
