Secured by Check Point

Good morning,

Please refer to the Region's response below regarding Case 51951/SDG A44Q3. Also, please be sure to provide detailed information about this issue in the SDG Narrative and let me know if you have any questions.

ISSUE: "Lab has received sample with higher sample volume then the required sample weight/volume for soil sample to perform the VOA analysis. Lab has analyzed sample A44R2 with 12.71g sample received for VOA analysis. Due to high sample volume, sample positive with high concentration of target analytes detected and also sample has internal standard and surrogate recoveries outside the QC limits as you can see attached quant report for your reference. In this case, Lab will report undiluted low level VOA analysis with surrogate and internal standard failure as first analysis and further dilution (medium level VOA) analysis for final electronic deliverables."

REGION: "Please have the lab proceed as indicated below. Thanks!"

***** Please note that in order to waive/remove defects associated to this issue, please send a detailed waiver request to the appropriate ASB PM.

Thank you,

Good afternoon,

Please advise on the laboratory's proposal for Case 51951/SDG A44Q3.

ISSUE: Lab has received sample with higher sample volume than the required sample weight/volume for soil sample to perform the VOA analysis. Lab has analyzed sample A44R2 with 12.71g sample received for VOA analysis. Due to high sample volume, sample positive with high concentration of target analytes detected and also sample has internal standard and surrogate recoveries outside the QC limits as you can see attached quant report for your reference. In this case, Lab will report undiluted low level VOA analysis with surrogate and internal standard failure as first analysis and further dilution (medium level VOA) analysis for final electronic deliverables.

Please see attached.
