Raylani,

E.coli testing is part of Total Coliform testing. So, if you have microcups with Sodium thiosulfate(Na₂S₂O₃), you should be good to sample.

Thank you!

Thank you, is E.coli run as the same test as coliform? We only need to test the samples for coliform so want to ensure extra analysis isn't done.

Are the sample bottles used for coliform the same as the ones used for Legionella testing? We will resample the locations you specified but wondering if I can use bottles originally intended for a legionella sampling project or if I need to request additional ones from Alliance.

Raylani,

Yes, rejection is for total coliform and E.coli testing for these samples. We will be analyzing Chlorine and Turbidity.

Thank you!

Good Morning,

The overfilling only corresponds to the total coliform samples for the locations you specified correct? Are you still able to analyze the Chlorine and Turbidity for those locations?

Subject: [--EXTERNAL--]: Samples Rejection - NYSOMH Emergency Service

Good Morning Carrie,

I am reaching out to inform you that for the Project NYSOMH Emergency Service, the sub lab has rejected Samples; B2-W8-RM1016-SINK ; B2-W8-RM1010-SINK and B2-W8-RM1011-SINK due to overfilling. We informed you in the past about this too (See Attachment).

These samples would require resampling if you still want to test them. Let me know.

Thanks.
