Hi Yazmeen,

I can source more sample, however, given the urgency of us needing the results today, I will just hold off on specific gravity until we can see our results today for the samples we already gave.

Thanks for your quick support on this!

Regards,

Sundas Pervez

Sundas,

Are you able to provide more volume? Specific Gravity would be a sub analysis, and we would need more volume to send to the sub lab.

Specific Gravity requires a 1L plastic. I could set someone up to bring you the bottles and wait while you fill the bottles?

Thanks, Yazmeen!

Looks good. Is specific gravity a possibility of running also? I believe I indicated that on the COC.

Sundas,

Please see attached. I highlighted all the analysis we will be running.

I wanted to give you a heads up we are no longer certified for Acidity, but we can still run the analysis.

Can we hop on a call with the lab manager to discuss this? Let me know if you are available.
He will need more information on these samples before analyzing, he is trying to avoid ruining the instruments.

Hi Yazmeen,

What do you mean by pure products? This is an acid mixture from our process acid tank containment. We suspect some foreign material may have fallen into that mixture that resulted in NO2 orange gas that we observed as a result. So, need to understand the constituents of our mixture.

Please let me know if you need help understanding further. Also, I requested 1 day TAT as this is urgent. Will we be able to get the results tomorrow?

Thanks.

Good afternoon Sundas,

Do you know if these samples are pure products?

I also, wanted to confirm the COC mentions a large list of analysis but the Lab Manager mentioned we can only run –

Acidity

Alkalinity

Ammonia

Phenolics

pH

TKN

Total Nitrogen

I am also not completely sure we have enough volume to run all these analysis (only received 1 plastic bottle for each sample).

But I will confirm once you let me know if the samples are pure products.

Best Regards,

Yazmeen Gomez
