To add more context – he mentioned the data for 8260 is already high.

John,

This was updated for 3 days – Mohammad is trying to push these out.

He also mentioned for q2233 (DUE TODAY) and q2234 – running Trace on these samples is not plausible as they are highly contaminated.

If you have any questions – it may be easier to speak over the phone, just let me know and I can coordinate a call with Mohammad.

Best Regards,

Yazmeen Gomez

Secured by Check Point

Yazmeen,

It looks like SDG Q2275 was incorrectly logged in for 5-day rush TAT – note the chain requested a 2-day rush TAT. The team is looking for data today – is the lab going to be able to make that happen?
