The Blank Spike met requirements for all compounds.

The Duplicate analysis met criteria for all compounds.

The Matrix Spike analysis met criteria for all compounds.

The Matrix Spike Duplicate (EFFLUENTMSD) analysis met criteria for all compounds
except for Phosphorus-Total due to Sample Matrix interference.

The Blank analysis did not indicate the presence of lab contamination.

The Calibration met the requirements.

E. Additional Comments:

As per method 1664A (TPH), MS/MSD is required to be performed with the sample
analysis. However, Lab did not receive sufficient volume to perform the MS/MSD
therefore MS/MSD were not performed for this project.

As per method 1664A (Oil and Grease), MS/MSD is required to be performed with the sample analysis. However, Lab did not receive sufficient volume to perform the MS/MSD for Q3019 therefore Lab reported MS-MSD from Q3057.
