Thanks for talking with me.

Deliverable should be Level 4. LSRP needs the full data package.  
Please leave the EPH analysis as is (standard TAT). And if we have to run the nap/2-meth expired then so be it.  
We will run the next set of samples is 5 day TAT with the nap/2-meth (on hold until we have the results).

Marcie

Hi Marcie,  
Please see the attached. Just want to confirmed a few things. I noticed the data package is marked for NJ reduced and level 4. Could you please confirm which package the lab should provide? I also wanted to confirm for EPH that the lab should run the full fractionation.

Last, I just want to point out the analysis that is on hold has a 14 days holding time. That being said the samples are being logged for standard TAT so therefore you will receive results on 4-06-21 which is after the holding time window has past. The lab recommends that the analysis be expedited for 5 days TAT in order to expedite results you a decision can be made for samples on hold.

Regards,

Steven Chaimowitz  
Project Manager
