**Subject:** Region 05 | Case 49662 | Lab CHM | Issue Insufficient/inappropriate designation of laboratory QC | FINAL  
**Attachments:** 49662-COC.pdf

Good morning,

Issue: The laboratory has one open SDG for seven days, SDG EW403 - which does not contain any samples for laboratory QC for Pesticides analysis. The laboratory would like to confirm if they may use sample EW410 received with shipment. The laboratory has confirmed that this sample is not a PE, blank, or rinsate sample.  
Resolution: In accordance with SFAM01.1, Exhibit A, Section 5.5.4.1, the laboratory can proceed with using the selected samples for laboratory QC.

Please note that the laboratory will have to contact the appropriate CLP COR should any defects need to be waived for this issue.

Thanks,  
Myles Hanger
