Hi Sharon,

As discussed on the phone earlier, we will process the samples that do not have any comments regarding TAT or due dates to have results reported on a standard 2 week TAT.

In regards to the fastest TAT available, at this point we can only guarantee a 2 business day TAT, so we will provide results for the Lead and Arsenic samples in which you requested rush TAT on Wednesday.

Lastly, the 5% discount that was agreed upon for the earlier drinking water samples will not apply here due to the number of separate SDGs and reports that need to be prepared.

Feel free to let me know if you have any questions.

Regards,

Steven Kim

Subject: Samples received 10/08/2018

Good afternoon Sharon,

The CoC forms do not list or specify the TAT or due date of the results for the samples that were received today. Please let us know what TAT you are looking for as soon as possible.

Regards,

Steven Kim
